

# Enclosure Heat Exchanger

## Dimensions

|  |            |  |                    |
|--|------------|--|--------------------|
|  |            |  |                    |
|  | Front View |  | Overall Dimensions |

|   |                      |                           |
|---|----------------------|---------------------------|
| 1 | Condenser            | Finned-tube air-cooled    |
| 2 | Power Terminal Block | Single Phase AC 220V 50HZ |
| 3 | Air filter           | 132 ×142mm                |
| 4 | Fan                  | SA1238A2HBL               |
| 5 | Mounting hole        | 10-Ø8 ×18                 |

## Specifications

|                               |                           |
|-------------------------------|---------------------------|
| Model                         | AE2A-F                    |
| Heat Transfer Capacity (50Hz) | 200W                      |
| Power Supply                  | Single Phase AC 220V 50Hz |
| Total Power Consumption       | 50W                       |
| Rated Current                 | 0.5A                      |
| Enclosure Paint               | RAL-7035                  |
| Dimensions                    | 65 ×250 ×580mm            |
| Mounting Cutout               | 210 ×280mm                |
| Condenser                     | Cross-fin coil type       |
| Fan Input Power               | 25 ×2W                    |
| Refrigerant                   | R-407C                    |
| Weight                        | 6.5kg                     |
